

Product Name :

Axial Flow Pump Module

Product Code :

SLE/EFM/03

**Description :**

- Axial flow pump, mounted in a mobile frame with full instrumentation, including a digital pressure display.
- Common motive-power source for a cost-effective solution.
- Fully variable speed and flow, for range of tests.
- Self-contained, has its own water reservoir and needs no external water supply.
- Allows students to study and test a common type of rotodynamic pump, safely and at a realistic scale.
- Part of Modular Fluid Power range which connects with the Universal Dynamometer
- Connection plate with schematic diagram shows the water flow circuit and how parts of the module connect to each other.
