

Product Name :

Digital Strain Display

Product Code :

SLE/ETP/11

**Description :**

- A sixteen channel instrument that connects to industry standard strain gauges to give direct readings of strain.
- For use with most types of metal-foil strain gauges, the Digital Strain Display connects to most types of strain bridge connections to give direct readings of strain.
- The Digital Strain Display accepts up to 16 channels from strain gauges connected in quarter, half or full bridge. The display is fully programmable to match the strain gauges and their bridge connections.
- The display includes precision internal 'make-up' resistors to work with half bridge connections if needed.
- Two channels include additional individually adjusted dynamic outputs.
- Also supplied is a tool that crimps the connectors to the cable. The connectors are self-locking, reliable, secure and need no soldering.
