

**Product Name :**

Free Vibrations Test Frame

**Product Code :**

SLE/ETM/08

**Description :**

- For use with Free Vibrations Experiments, the Test Frame fits on any standard desk or bench top.
- Students, teachers or lecturers fit the parts of their free vibrations experiments to the Test Frame to study or demonstrate a free vibrations topic.
- The Test Frame has two extruded alloy horizontal members each with slotted fixing points to all four sides.
- The two triangular sides each have adjustable levelling feet.
- A stable, level Test Frame is essential in vibration experiments to give repeatable and accurate results.
- Include a storage tray and lid with the Test Frame.
- The sturdy construction is necessary for accurate results in vibration experiments, but this also gives the frame a long service life.
- The Test Frame also includes a hexagon tool and a spirit level for easy assembly and levelling.
- Despite its sturdy construction, the frame is light enough for two people to move it around the classroom easily.
- This is useful to store tools and smaller parts of your optional experiments, helping prevent accidental loss or damage.
