

**Product Name :**

Electricity Circuits Kit

**Product Code :**

SLE/PHY/92

**Description :**

The Basic Electricity Kit has been designed as a low-cost, attractive and flexible alternative to the circuit-board approach to pupil investigations into simple circuits. The panels are then formed into circuits by connecting them together using 4 mm stackable leads. Each component such as a switch, rheostat, bulb holder, etc. is mounted on its own individual plastic panel with 4 mm sockets. This equipment is suited not just to teaching basic concepts about circuits, for key stage 2 students, but also has applications for further study into key stage 3 areas. Each kit is supplied in two polystyrene trays which keep the units organised.
