

Product Name :

Flexible Camera

Product Code :

SLE/M/46

**Description :**

With its flexible gooseneck mount and flat sturdy base, this versatile digital camera can be used alone or attached to a computer to capture images of macro and micro specimens.

It features a high-definition 5-MP sensor, 30-fps frame rate, autofocus, and connects with a single USB cable for plug-and-play ease of use.

The included Applied Vision 4.0 software enables you to capture and manipulate images.

Free EduCam software allows you to broadcast camera images in real time to tablets, smartphones, and computers running the mobile app.

The app fits perfectly in one-to-one, one-to-many, or bring your own device (BYOD) environments.

This seamless collaboration solution helps you keep students engaged and leverages your device investment.

Frame Rate:30 fps @ 1,920 x 1,080 pixels
