

Product Name :

Wilmshurst Electrostatic Machine (for
lyceum)

Product Code :

SCL2301/031

Description :

High-voltage generator with two plastic discs

Diameter : 20 cm

Rotating in opposite direction, on which tinfoil sheets are deposited

Consist of two disks, two Leiden cans, crests, brushes, dischargers and support

Two sets of brushes collect the loads and store them in two condensers

The condenser electrodes are connected to two metal rods with an insulated handle, the distance between them can be varied
