

**Product Name :**

Spectral Tube Set with Voltage Source (for high school)

**Product Code :**

SCL267/043

Image not found or type unknown

**Description :**

Set of 5 tubes with H<sub>2</sub>, O<sub>2</sub>, Ar, CO<sub>2</sub>, Ne, with two electrodes at the ends, length about 200 mm.

When applying a high voltage there is an electrical discharge into the gas atmosphere.

Tubes are narrowed in the middle to allow spectroscopic observation of the emission lines

The set should include a high voltage source with adaptable support for connecting the tubes

When connecting the source, there is an electrical discharge through the tube and the internal gas is illuminated

Power consumption : 4,5 W
