Product Name :

Tape

Product Code :

SCL109/1.3

Description :

DESCRIPTION :-

Material: metal

Tape measures are relatively safe and easy to use.

Extend the tape from point to point placing the end-clip at the location you want to measure from.

Most tape measures have a clip that can be attached to a fixed object to measure spans easily.

Many steel blade tapes have tension-control brakes that lock the blade in place for measuring spans.

Longer tapes have a crank on the side of the case to retract the cloth tape.
