

Product Name :

Apparatus Heat/Thermal Conductivity

Product Code :

SLE/PHY/12

**Description :**

The apparatus consists of a wood compound ring with four pointed strips of metal attached at 90 degrees to each other around the ring. The strips are attached so that their points are in the center of the ring. At the other end of each strip there is an indentation for holding water. Depending on the conductivity of the metal the water will evaporate at different times. Each strip is made of a different metal – aluminium, brass, copper and iron.
