### Specifications:

Material: Cast iron top and mild steel legs painted.

Zinc coated legs are bent outwards for stability.

A tripod is a portable three-legged frame, used as a platform for supporting the weight and maintaining the stability of some other object.

A tripod provides stability against downward forces and horizontal forces and movements about horizontal axes.

A laboratory tripod is a piece of three-legged equipment commonly used to conduct experiments in laboratories.

It is used as a platform to hold and support glassware, such as beakers and flasks, during experiments
