Product Name :

Apparatus for Measuring the Density of Solids

Product Code :

SCL-381/010

Description :

Benefits :-

- Real stand material for an especially stable and safe setup
- Student-suitable experiment descriptions with reports available

DESCRIPTION :-

- Solid state density measuring device consists of a mild steel base with size (200 X 125 mm),
- Two mild steel rods with dimensions (600 X 12 mm) (L x Diameter), a steel rod with dimensions (200 x 10 mm) (L x Diameter), a thread of cotton material, scales for weights of masses up to 100mg, a spring scale for weights (250mg / 5mg / 2.5g), a plastic cup 250 ml, a 250ml cylinder and bodies with the same shapes and sizes of different materials such as: wood, plastic, bronze, aluminum, iron, lead, etc ..
