

Product Name :

NPN Transistor

Product Code :

SCL-439/116

**Description :****DESCRIPTION :-**

- Npn transistor of different values
- A NPN Transistor is a type of NPN bipolar junction transistor.
- Circuits where a low-current, high-speed transistor is required will employ a transistor.
- It is suitable for many applications like Electrical or Electronic mini or major projects, Amplifier purposes, DIY projects etc.
- Maximum Power Dissipation: 625mW
- Collector Current: 0.6A
- Operating Temperature: -65 to 150 Degree Celsius
