

**Product Name :**

Pathology of the Human Pancreas, Duodenum,  
and Gallbladder Model

**Product Code :**

SLE/A/146

**Description :**

Life size.

On a base.

Size (with base), 11 x 11 x 24 cm.

This model depicts the most important diseases of the gallbladder, pancreas, and duodenum. The gallbladder, partially opened, shows stones located in various locations, cholecystitis, polyposis, and carcinoma.

Diseases of the pancreas shown include pancreatitis in the pancreas tail and cancer in the pancreas head.

Also shown is a section of the duodenum with a duodenal ulcer.
